

ECOPHON

FOCUS™ Ds

EASIER INSTALLATION. BETTER ACOUSTICS.

THE NEW IMPROVED FOCUS Ds

EASIER INSTALLATION.
BETTER ACOUSTICS.

Our popular Focus Ds edge is now available with a simplified single-layer system that allows for easier installation. You still get an equally robust result that neither compromises with appearance nor acoustics.

FASTER AND EASIER INSTALLATION

The new Cross Tee system has fewer components and saves valuable installation time. The upgrades are made possible by advanced engineering and innovative built-in features – allowing you to embrace simplicity without jeopardising quality.

For installations of panels 600x600 and 1200x600 mm, **the Space bar will no longer be needed**, which also contributes to easier and faster handling.

HIGH PRECISION SYSTEM

The new T24 profiles – **Precision Lock** – are robust and have a unique locking function that is **>75% stronger** than ordinary profiles. The result is a system with high precision and stability over time. The single-layer installation also allows for easy integration of lighting units and ventilation.

PRECISION LOCK

UPDATED SPACE BAR SYSTEM

The new Precision Lock main runner is now also applied to the Space bar system, making it more ergonomic and still as robust. The Space bar installation is still required for all formats above 600x600 and 1200x600 mm. New Space bar: art no. 26300770

ECOPHON FOCUS™ Ds

IMPROVED ERGONOMICS

With a single layer of material-optimised profiles, **the grid weight is significantly reduced**, and profiles are **easier to cut**. The panels also weigh less, thanks to adjustments in the glass wool structure. Some welcome improvements for the installer.

LOWER CLIMATE IMPACT

Every component in the new system is finely tuned to maximise performance while minimising environmental footprint. Both panel and grid weigh less and **demand less material** during manufacturing, leading to considerable climate savings throughout the product life cycle.

**“THIS GRID IS THE
BEST I’VE SEEN IN
40 YEARS.”**

- Thomas Wendt, Installer -

CLASS A ABSORBENT

IMPROVED FROM α_w 0.90 TO **0.95**

EVEN BETTER ACOUSTICS

We have gone to great lengths to refine and simplify the installation of Focus Ds. We're equally excited to announce the acoustic advances, as the sound absorption is now improved from α_w 0.90 to **0.95** (at o.d.s. 200 mm). So, we can confidently say your environment will sound as good as it looks.

EASIER - BUT EQUALLY APPEALING

Focus Ds is widely appreciated for its concealed grid and symmetrical bevelled edge, giving your suspended ceiling an **even appearance**. All this still applies, now it's just easier to get there. Available in 22 standard colours for maximum design flexibility.

Please get in touch with us for more details on the upgrades or visit www.ecophon.com/en/launches/focus-ds/ where you'll find all product information and videos showing the installation process.

Ecophon is the leading supplier of indoor acoustic solutions that improve working performance and quality of life. We believe in the difference sound can make to our everyday lives, and are passionate advocates for the importance of room acoustics to people's wellbeing – whatever the space, activity or need.

Having a sound effect on people is the principle that guides all we do. We're proud of the Swedish heritage and human approach that promise is founded on. And, as members of the Saint-Gobain Group, to be doing our part in making the world a better home.
